Vacuum science... product solution.

a clear edge

maximise your productivity and performance

Features and benefits

Pre-configured pumping systems enabling ease of installation and operation

Packages and pumping systems suitable for a wide range of applications and environments

Packages configured for Hydrocarbon or PFPE lubrication (fluid Included)

Maximum uptime with minimal maintenance for reduced user intervention

Able to operate continuously at high pressure levels

Consistent and repeatable performance in the most demanding of applications

No contaminated waste oil for disposal or reclaim

Drystar® GV80 and EH500 booster configured packages

Edwards DRYSTAR® GV80 dry vacuum pump provides a clean, robust and low cost alternative to traditional oil-sealed pumps.

The pump is designed to handle large volumes of condensable vapours and particulate loads for a consistent pumping performance, minimal service intervention and low cost of ownership.

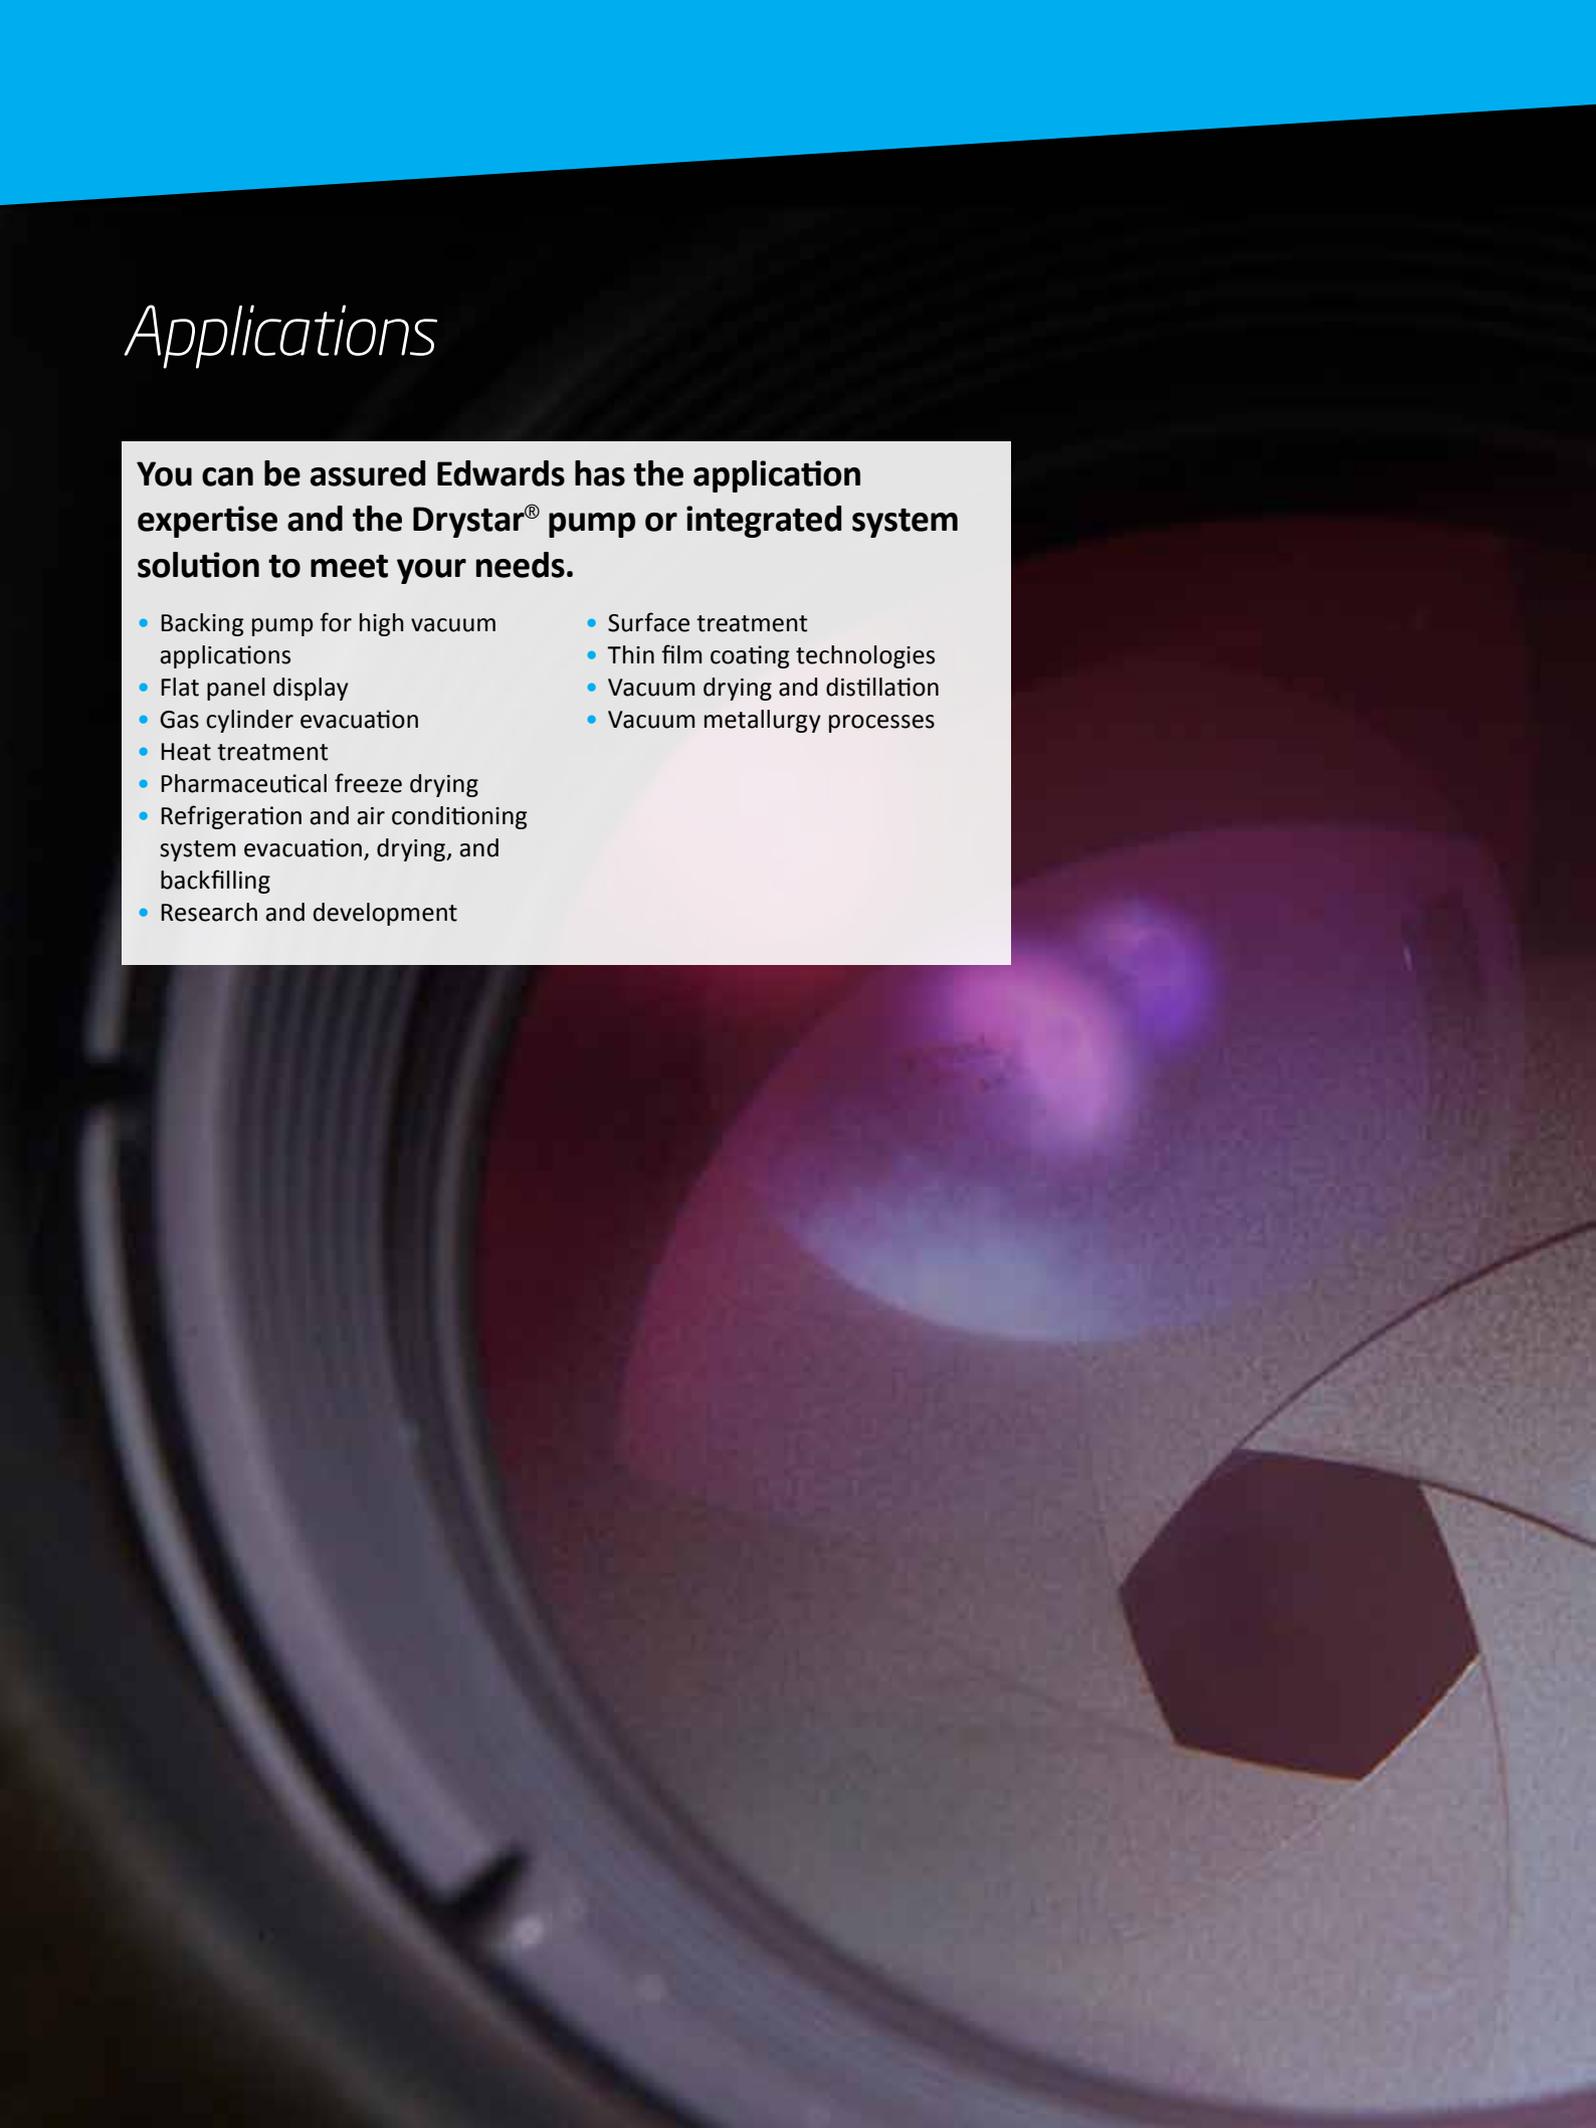

The DRYSTAR® GV80 dry pump is available as a stand alone unit for $80\text{m}^3\text{h}^{-1}$ repeatable fast pump performance, or combined with the EH500 hydrokinetic drive mechanical booster offering $500\text{m}^3\text{h}^{-1}$ for applications where increased pumping speed and/or lower vacuum levels are required.

Applications

You can be assured Edwards has the application expertise and the Drystar[®] pump or integrated system solution to meet your needs.

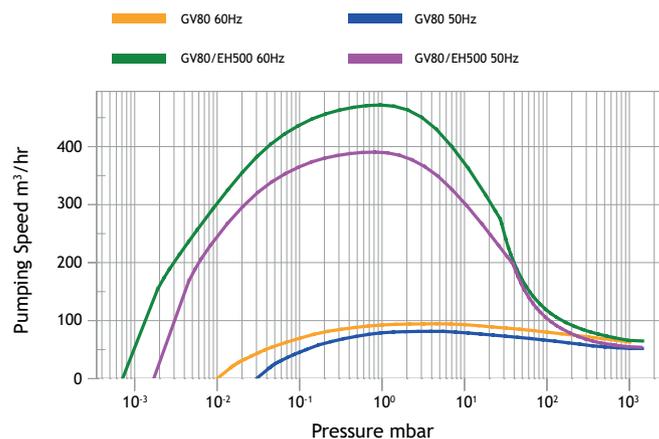

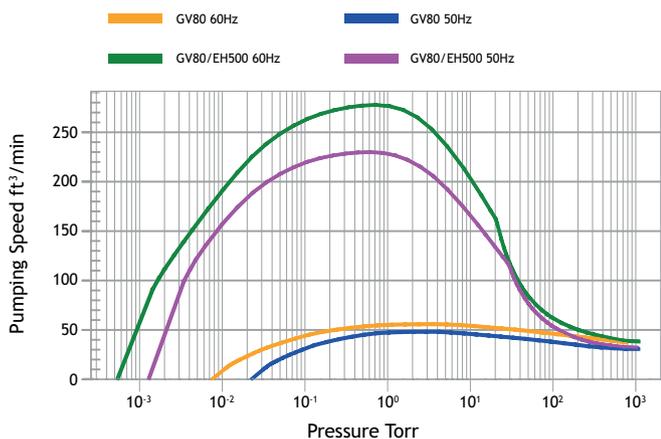

- Backing pump for high vacuum applications
- Flat panel display
- Gas cylinder evacuation
- Heat treatment
- Pharmaceutical freeze drying
- Refrigeration and air conditioning system evacuation, drying, and backfilling
- Research and development
- Surface treatment
- Thin film coating technologies
- Vacuum drying and distillation
- Vacuum metallurgy processes

Technical data

		Unit	Drystar® GV80	Drystar® GV80/EH500
Peak pumping speed 50 Hz		m ³ /hr (cfm)	80 (47)	390 (230)
Peak pumping speed 60 Hz		m ³ /hr (cfm)	94 (56)	471 (277)
Ultimate pressure		mbar (Torr)	<3 x 10 ⁻² (<2 x 10 ⁻²)	<3 x 10 ⁻³ (<2 x 10 ⁻³)
Full load power	@ ultimate pressure	Kw (hp)	3.6 (4.8)	4.3 (5.6)
	@ peak pumping load	Kw (hp)	5.8 (7.8)	6.7 (9.0)
Electrical	Supply options	200-230 V 3Ø 50/60 Hz or 380-460 V 3Ø 50/60 Hz Note: See part numbers for specific voltage offerings		
Vacuum couplings	Inlet		ISO40	ISO100
	Exhaust			NW40
Cooling			Water	Water/Air
Cooling water	Flow	l/min (gal/min)	1 (0.26)	1 (0.26)
	Supply pressure (MAX)	bar.a (psig)		8 (116)
	DP across pump (MIN)	bar.a (psig)		2.1 (30)
	Temperature	°C (°F)		5-35 (41-95)
	Connection	In	1/2" Quick connect coupling (mating half provided)	
	Out	1/2" Quick connect plug (mating half provided)		
Purge gas (N ₂ or CDA)	Pressure	bar.a (psig)	0.5 (6-8)	
	Light duty	sl/min	15	
	Connection		1/4" Quick connect coupling (mating half provided)	
Dimensions	L x W x H	mm (in)	832 x 607 x 344 (32.6 x 23.9 x 13.5)	904 x 607 x 624 (35.6 x 23.9 x 24.6)
	Footprint	m ² (ft ²)	0.43 (4.63)	
Weight		Kg (lbs)	145 (320)	220 (485)
Noise level with exhaust silencer		dB(A)	<78	
Exhaust Back Pressure (MAX)		bar.a (psig)	1.3 (0.4)	
Lubrication	Volume	l (gal)	0.4 (0.1)	1.4 (0.4)
	Type	Hydrocarbon	SHC 629	SHC 629/Ultragrade 20
		PFPE	YVAC 25/6	YVAC 25/6 / YVAC 16/6

Accessories

NRA640450	Atmospheric Shaft Seal Purge Kit
A50805020	Exhaust Silencer
A50575000	Acoustical Enclosure (Customer Assembly)
A70212825	DRYSTAR® GV80 Routine Maintenance Kit
A30151815	EH500 Clean and Overhaul Kit

Note: Atmospheric Seal Purge to be used in clean applications only, not suitable for applications with continuous operating pressures above 100 torr.

SSP = Shaft Seal Purge
 PFPE = Filled with Inert Fluid
 MCM = Motor Control Module
 (Motors Stators, Fault Indication EMO and Remote Start Stop Capability)
